

## FEATURES & BENEFITS

### ACOUSTIC MESH

Maximizes hearing while blocking water, cold air, dirt and bacteria

### STABILIZATION WINGS

Secures earplugs during rigorous activities (two sizes included)

### ADJUSTABLE SILICONE STRAP

Optional strap offers security during use

### CUSTOMIZABLE FIT

Includes interchangeable sizes of Buds and Stabilization Wings to ensure a watertight and comfortable fit

### BUDS

Blocks water by sealing ear canals (three sizes included)

### IMPROVES SAFETY

Allows swimmers to easily hear and hold conversations with coaches, lifeguards and other swimmers

### IMPROVES EAR HEALTH

Helps prevent swimmer's ear (otitis externa) and surfer's ear (exostosis)

### CARRYING CASE

Keeps earplugs clean and protected

### CORE

Boosts acoustic performance and enables custom fit of Buds and Stabilization Wings

### LET SOUND IN, KEEP WATER OUT

Outperforms all other earplugs on the market – seals and protects ears without interfering with hearing

## PRODUCT DESCRIPTION

First created by EarLabs AB in Sweden with support from Danish open-water swimmer, Hans Henrik H. Heming, SwimEars® earplugs let sound in and keep water out. With over 1,000 hours of design, development and prototyping, SwimEars® earplugs have proved successful in all elements, from icy cold winter swells in Sweden to tropical surf in Barbados. SwimEars® earplugs offer a revolutionary design that blocks water, cold air, dirt and bacteria to help prevent ear inflammation (swimmer's ear) and bone growth in the ear canal (surfer's ear).
