No straps to cut off circulation of hands and wrists

ALL FOUR SWIM STROKES

Versatile tool for butterfly, backstroke, breaststroke and freestyle

COMFORTABLE THUMB HOLE

Creates proper hand placement with thumb and fingers in ideal position

PRODUCT DESCRIPTION

The convex design of the Agility Paddles promotes an early catch and an early vertical forearm position. Due to the paddles' strapless design, incorrect technique will cause the paddle to fall off. Additionally, the absence of straps also makes for a simplified fit, eliminating the hassle of broken or uncomfortable straps. The ergonomically-advanced design of the Agility Paddles requires a proper palm positive hand position. The Agility Paddles are a versatile tool for all four swim strokes and accommodate most hand sizes.
